

Construindo layouts com **HTML e CSS**

Prof. Márcio Ferreira

Márcio Ferreira

- Trabalha com Tecnologia HTML, CSS e JS desde 2009
- Graduado em Analise e Desenvolvimento de Sistemas
- Pós graduado em Engenharia de Software
- Desenvolvedor Full Stack na Itarget Tecnologia (PostgreeSql, HTML, CSS, JS, ReactJS, React Native, Laravel, PHP, NodeJs e Docker)
- Professor na Faculdade Cearense (Engenharia de Software, Programação Orientada a Objetos, Estrutura de Dados, Programação para Internet e Dispositivos Mobile)
- Professor Full Stack

Sobre vocês?

- Qual é seu nome?
- Você trabalha com Tecnologia?
- Você programa em alguma linguagem?

Desenvolver layouts parece difícil, não é verdade?

HTML - Hypertext markup language

HTML apenas joga conteúdo em uma página web.

Não conseguimos manipular posições apenas com HTML.

Para manipular e colocar posições precisamos de **CSS**.

```
<!DOCTYPE html>
<html>
<body>

  <h1>Titulo</h1>
  <p>Isto é um parágrafo</p>
  <a href="#">Um Link</a>
  <br />
  
  <table></table>
  <ul>
    <li>Item da Lista</li>
    <li>Item da Lista</li>
  </ul>

  <form>
    <input type="text" placeholder="Isto é um campo" />
  </form>

</body>
</html>
```

Página do código anterior

Veja como é simples, parece que estamos em um bloco de notas.

Titulo

Isto é um parágrafo

[Um Link](#)

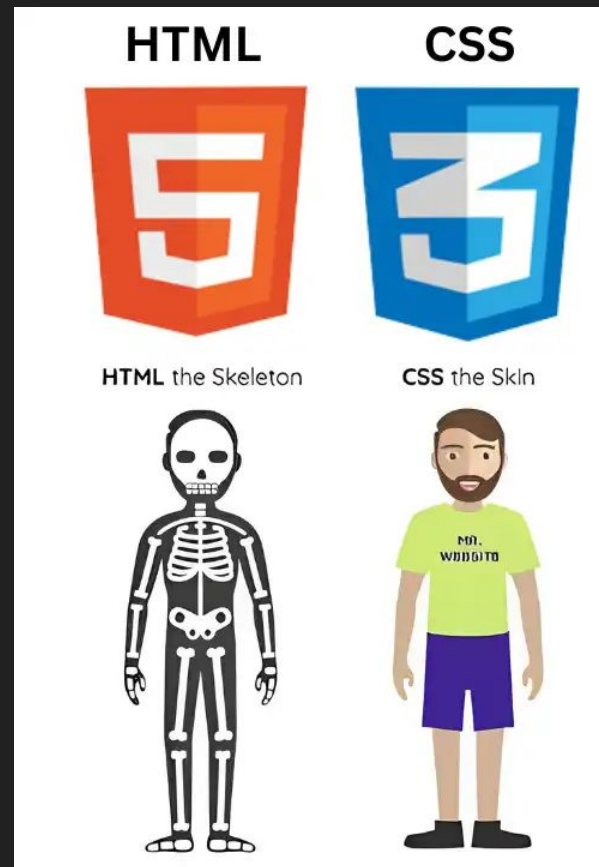

- Item da Lista
- Item da Lista

Isto é um campo

CSS - Cascading Style Sheet

CSS significa Folha de Estilo em Cascata.

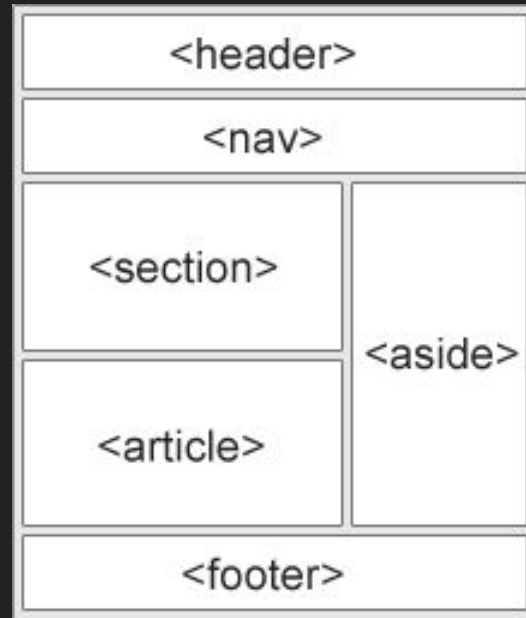

Com ele conseguimos manipular o HTML e deixar tudo na forma que queremos.

Tag para auxiliar em nossos layouts

No HTML5 existem tags para nos auxiliar nos agrupamentos de conteúdos, são elas:

- header
- nav
- main
- aside
- section
- article
- footer
- div

Nosso Layout

Discover new data analytics tools

Data science for SEO

Learn to gather and analyze data provided by Google Analytics, search consoles & web servers with our new data science course.

20-22
September
3 days of intense practice

24
Hours
10:00 AM - 6:00 PM

20
Seats
Limited number of seats

Price
\$245
Best offer

24
Hours
of practice and immersion
in data science for SEO
specialists
Level
Intermediate

About the course

Every day, Google Analytics, Google Search Console and your web server collect millions of data rows, and SEO experts often only look at summary graphs and rejoice when they increase and get upset when they decrease. It is time to understand the causes and consequences and take the first step in Data Science - dig into this data with your head and find the answers.

There's no need to invent Google's conspiracy theories if you can find out how data science works and test its main techniques in SEO. Book your seat to get instant access to the course.

[BOOK A PLACE](#)

Who will benefit

In-house SEO specialists working on large projects

Licensed SEO experts and SEO enthusiasts

SEO geeks

Sign up for the course now

and get a PDF course report & certificate via email
